Electronic Safes

Yale Electronic Safes provide you with a basic level of security for those items you need more regularly, such as keys, passports, cash and cards.

Each safe is accessed via an easy to set three to eight digit PIN. Two keys are also supplied, in case of a forgotten PIN.

The safe features a two-stage lockdown mechanism. It first activates for 20 seconds if an incorrect PIN is entered three times. If three more incorrect PIN entries occur, the lockdown extends to 5 minutes. The lockdown can be stopped by using a key to open the safe.

The safes come in a variety of sizes from mini to laptop variants, allowing you to choose a safe that best suits your needs.

A basic level of security suitable for:

Important Documents

Passports

Smart Devices

Keys

Laptop

Camera

- Electronic lock with handle for easy opening
- 3 to 8 digit PIN code access
- Automatic lockdown: The keypad locks down for 20 seconds after three incorrect PIN entries. After three more incorrect PIN entries, it locks down for 5 minutes
- Easy one-touch PIN reset button inside the safe
- Locking mechanism: Anti-bump solenoid (prevents 'bump opening')
- Mechanical override - two radial keys supplied to open the safe in case of a forgotten PIN
- Simple LED light status indicators

2 YEAR GUARANTEE

Trusted every day
